Mohammed Kord

Hebron, Palestine — alkurd.2000.md@gmail.com
github.com/MohammadAlkurd — mohammadalkurd.github.io/Portfolio — itch.io/mohammadalkurddev

Education

Palestine Polytechnic University, Hebron Expected 2029
B.Sc. Computer Engineering

- GPA 96.1/100 after first year; currently in second year

Projects

Textbook RAG backend C#, ASP.NET Core, MinerU, Ollama, Qdrant

- Self-hosted service that ingests STEM textbook PDFs, converts them to Markdown with LaTeX formulas using MinerU OCR, splits them by heading, and indexes embeddings (local Ollama model) in Qdrant. A query script retrieves chunks and answers with a local LLM, citing section headings.
- Upload API with validation, a bounded background job queue, page-level progress reporting, and SHA-256 caching so known books skip OCR.
- Processed a 347-page textbook in about 4.5 minutes on an 8 GB GPU (1,322 chunks). Retrieval quality is not yet measured; known weaknesses are documented in the README.

Hand Gestures To Action Python, PyTorch, MediaPipe, PyQt6

- Desktop app that records custom webcam gestures, extracts MediaPipe hand landmarks, trains a small MLP classifier, and runs live inference that triggers keypresses or scripts.
- Redesigned the pipeline from a CNN on raw frames to landmark-based features with an MLP; added mirroring augmentation to handle left- and right-handed users.

Ragdoll reinforcement learning Godot 4, C#, Python

- Trained a ragdoll agent with PPO through the Godot RL Agents plugin, exported the policy to ONNX, and run it in-engine from a C# controller without Python.

Games Godot, C#

- Published three games on itch.io, including a Quoridor implementation.

Competitions

- 11th place, Palestinian Collegiate Programming Contest (ACPC national qualifier), October 2026
- Competitive programming in C++ (algorithms, dynamic programming, graphs)

Experience

Freelance Android Developer, Upwork

- Delivered two client apps in Kotlin, both rated 5/5.

Skills

Languages	Python, C#, C++, Kotlin, SQL
ML	PyTorch, MediaPipe, reinforcement learning (PPO), embeddings and retrieval
Backend	ASP.NET Core, Entity Framework Core, REST APIs
Tools	Git, Linux, Docker, GitHub Actions
